

Do you know Gigaguhl, the giant?

Despite his great size, Gigaguhl is extremely friendly. He especially loves animals. A family of bats sleeps under his arms. Goats hide among the hills of his neck. And a rare unicorn lives deep in his hair.

One evening, Gigaguhl feels very tired, so he covers himself with a colorful summer meadow and sleeps for a hundred years. During that time, a city springs up across the expanse of his back. Of course, its residents have no idea who is slumbering beneath them... until two curious children go out exploring and experience a gigantic adventure.

- The new book by the Spiegel bestselling author of *Zippel*
- Hide and seek fun for even the youngest of readers: Willy Peter Millimeter is hiding on every page, just waiting to be found
- Marvellously illustrated by internationally renowned cartoonist Barbara Yelin
